SUMMARY

Computer systems engineer and full-stack technical lead. I lead the development of SATIUM, a tax-compliance SaaS ERP for Mexico, Chile and Peru with fourteen applications in production (FastAPI, React, PostgreSQL, Google Cloud). I have migrated legacy systems reconciling the data to the cent, and I run the platform with AI agents as part of the team. Looking for a senior full-stack or technical-lead role, remote, in Mexico or the United States.

EXPERIENCE

Satium Technologies

Mar 2026 – present

Web & AI Development Manager

Remote

- Lead the engineering team (3 people) plus AI agents; own architecture, priorities and deployments of the platform.
- Built the API (FastAPI, PostgreSQL on Supabase, Cloud Run) and the frontend (React, TypeScript) of 14 applications: accounts payable, e-invoicing, manufacturing costs, travel expenses, human resources, visitor management and more.
- Migrated Toyota's Costs and Travel Expenses from a fifteen-year-old Java system: 593,349 rows and MXN \$42M reconciled to the cent against the original; 40 tables, 65 routes and 24 screens.
- Moved heavy work to Cloud Run Jobs: exports from 16 min to 87 s; regenerated 1.46M tax PDFs; the SAT blacklist went from 5.5M rows to 635K validity periods and lookups from 71 s to 0.5 s.
- Implemented e-invoicing in Mexico (CFDI 4.0 and payroll through a PAC), Chile (DTE via OpenFactura and SII vault) and Peru (SUNAT), plus full Mexican statutory payroll (income tax, IMSS, IDSE, profit sharing, severance).
- Run production: multi-tenant with five access levels, Slack alerting, backups and living documentation; defined the AI-agent workflow (spec, reconciliation, tests, browser verification).

SIAREX Technology

Mar 2025 – Jan 2026

Full-stack Developer (internship)

Remote

- Enterprise backend in JavaEE with MySQL on the system SATIUM now replaces; database maintenance and version control with GitHub.
- Documented the legacy business rules (Costs, Expenses, HR, Visits) that I later migrated.

Freelance projects

2023 – 2024

Developer

Tepic, Nayarit

- Club del Valle: member management system with React and Firebase, automated emails through Mailjet.
- Point of sale integrated with Google Sheets for La Crudelia Grill; Java desktop application for a dental office.

PROJECTS

Eventleta · eventleta.com · 2026. Registration platform for 5K, 10K and 21K races: Mercado Pago payments, QR bib and organizer dashboard. React, FastAPI, PostgreSQL, Cloud Run. In production.

EDUCATION

Instituto Tecnológico de Tepic (TecNM)

2020 – 2025

B.Eng. in Computer Systems Engineering, Web Development specialization. Degree awarded August 2026.

BIG school

Sep – Dec 2026

Master's in Artificial Intelligence: agents and LLMs, Claude Code and Codex, automation with n8n and Make, vibe coding. In progress.

CERTIFICATIONS

FastAPI: The Complete Course (Udemy, 2025) · Introduction to Data Science (IE University, 2025) · Entrepreneurial Methodologies Diploma (TrepCamp, 2025) · Introduction to Cybersecurity (Cisco, 2024)

SKILLS

Backend: Python, FastAPI, SQLAlchemy, PostgreSQL, Supabase, Pydantic, WeasyPrint, openpyxl

Frontend: TypeScript, React, Vite, Tailwind, shadcn/ui, Three.js, PWA

Cloud & operations: Google Cloud Run and Cloud Run Jobs, Cloud Storage, Firebase, Docker, BigQuery, Slack alerting

Tax: CFDI 4.0, SAT, PAC, SII (Chile), SUNAT (Peru), IMSS / IDSE

AI: Claude Code, Codex, OpenAI API, tool calling, Playwright

Legacy: Java, JavaEE / Struts, MySQL, Tomcat

Languages: Spanish and English

Interests: High-performance frontenis: United States national team player.
